# 1 How to reach the download portal

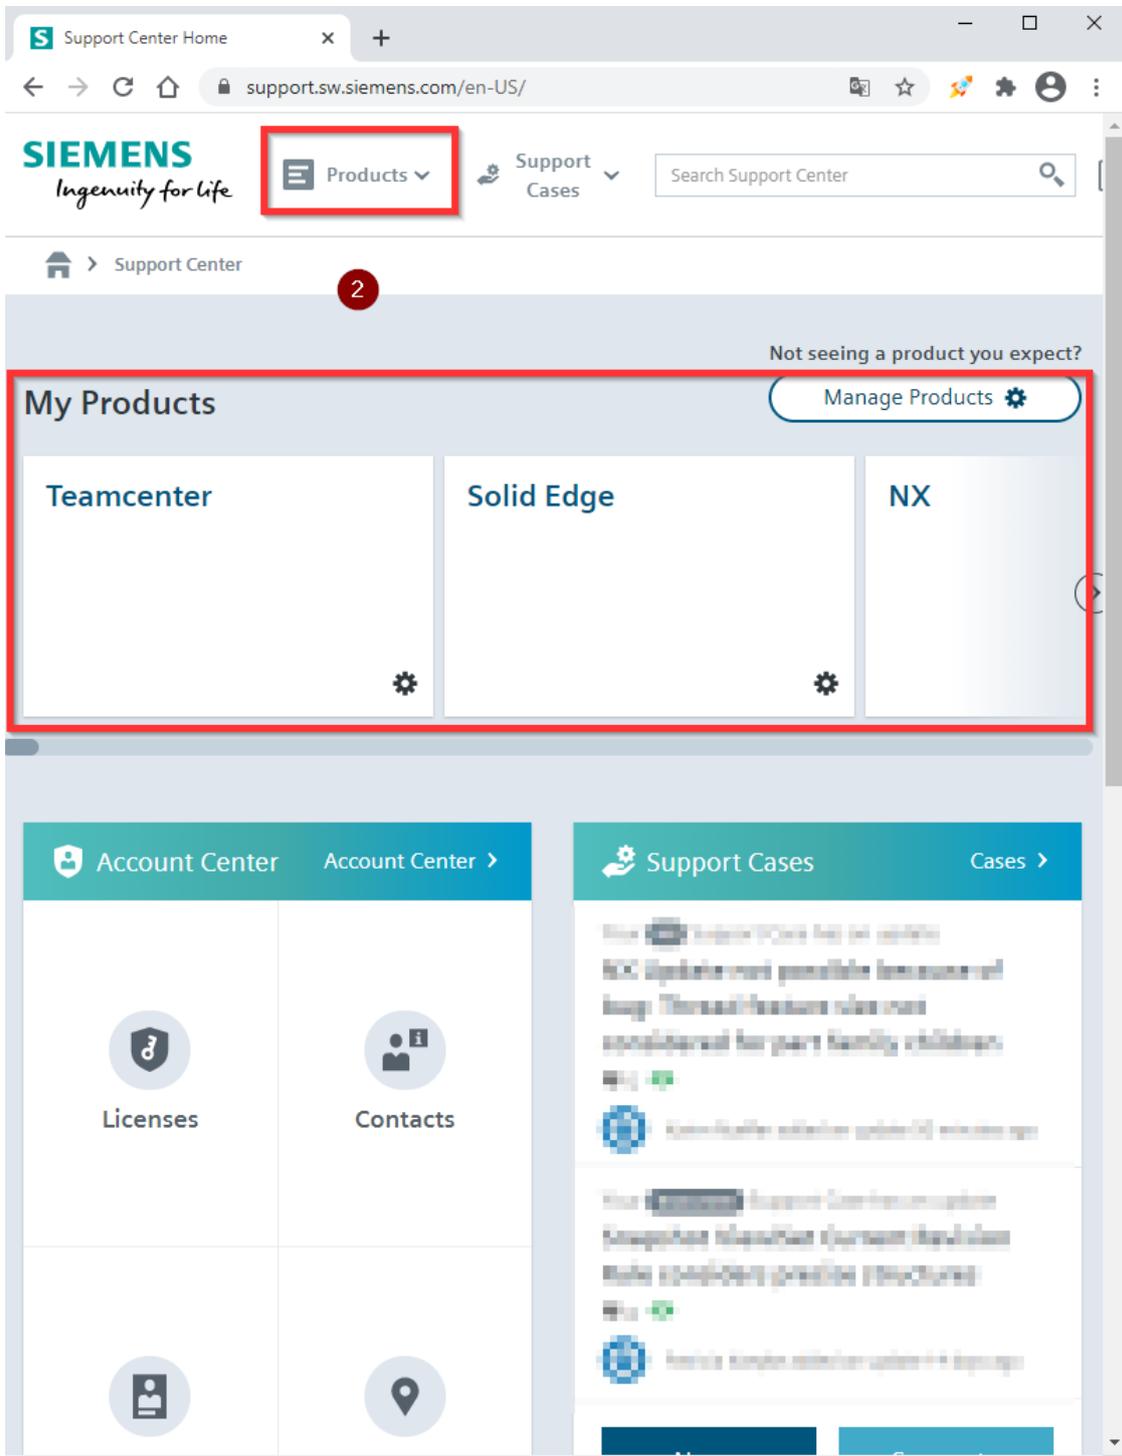

To download different versions of the Siemens software, please open the following link to get to Siemens Support Homepage.

- 1) Link: <https://support.sw.siemens.com/en-US/>
- 2) Enter your login details. If you do not have access, create a WebKey access. BCT will gladly provide you with the corresponding instructions.

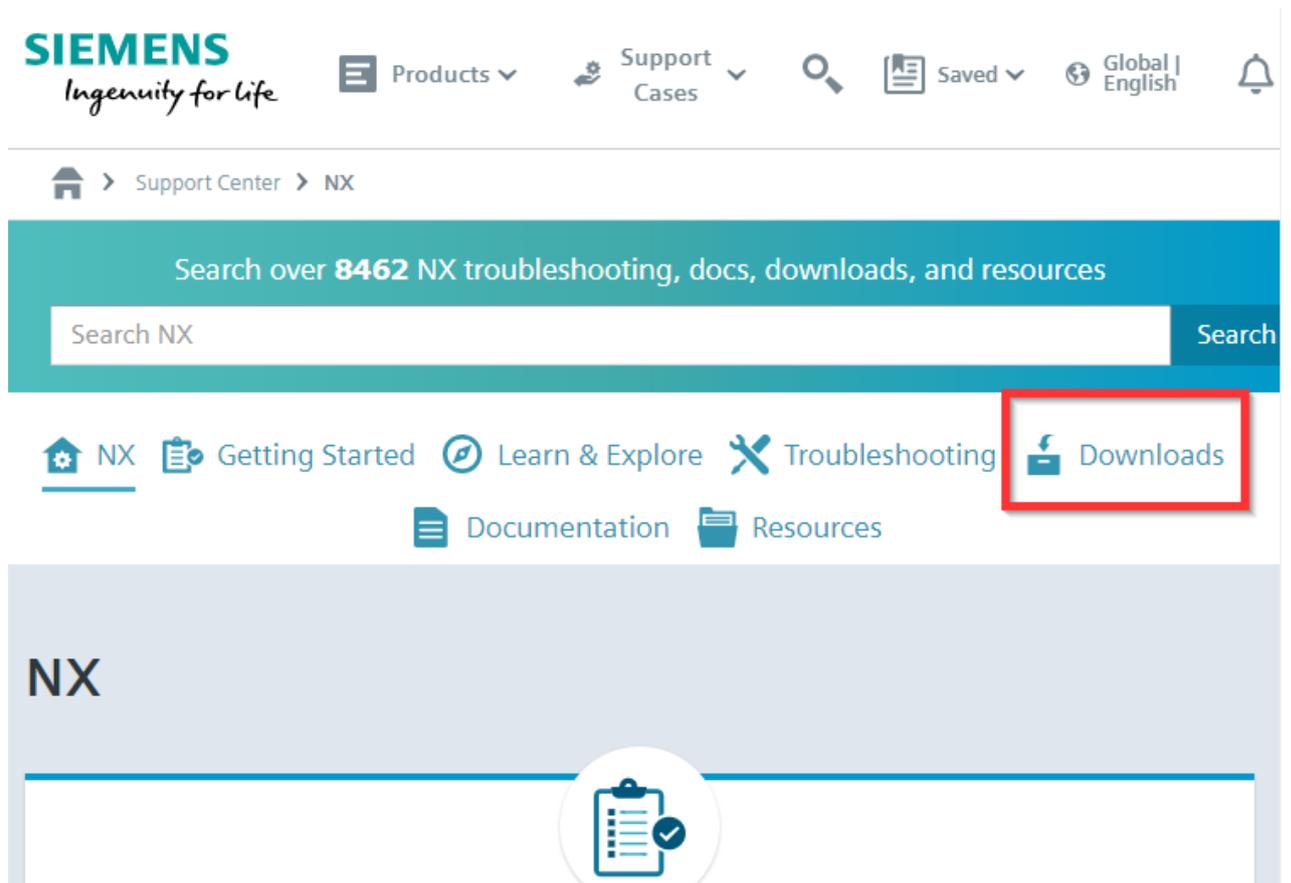

The screenshot shows the Siemens Support Center login interface. At the top, the Siemens logo and tagline 'Ingenuity for life' are displayed. Below this is a teal banner with the text 'Welcome to Support Center'. The main content area is white and contains the instruction 'Please sign in with your email and password.' There are two input fields: 'Your Email' with a user icon and the text 'user@domain.com', and 'Your Password' with a lock icon and the text 'Enter your password'. Below the password field is a checkbox labeled 'Show Password' and a link 'Forgot your password?'. A large orange button with the text 'Sign In >' is positioned below the input fields. At the bottom, there are two boxes: one for 'Need an account? Register Now.' and another for 'New to Support Center? Learn more about Support.'

3) Please select your product in the drop down menu or under “My Products”.

4) Select "Downloads"

The screenshot shows the Siemens NX Support Center interface. At the top left is the Siemens logo with the tagline "Ingenuity for life". To its right are navigation links for "Products", "Support Cases", a search icon, "Saved", "Global English", and a notification bell. Below this is a breadcrumb trail: "Home > Support Center > NX". A teal search bar contains the text "Search over 8462 NX troubleshooting, docs, downloads, and resources" and a "Search NX" input field with a "Search" button. A horizontal menu below the search bar includes "NX", "Getting Started", "Learn & Explore", "Troubleshooting", and "Downloads" (which is highlighted with a red rectangular box). Below this menu are "Documentation" and "Resources" links. The main content area has a large "NX" heading and a central circular icon of a clipboard with a checkmark.

## 2 How to find the Software Version and the install package

5) Select the desired version.
